Upgrade this system to a twin propane Manual Changeover by Steel Hose (01-6050SS)

Upgrade this system to a twin propane Automatic Changeover by fitting a 01-1755 and an extra Stainless Steel Hose (01-6050SS)

Typical Truma regulator installation mounted vertically. The 10mm copper compression fitting has been unscrewed for changing.

Replaced regulator using the existing compression nut and olive. Unit shown has an optional right angle adaptor (01-1677-300) fitted on top due to height restriction.

**...Replace it with
a Gaslow 300
Universal Regulator
System!**

...so why take the risk? Replace it now and guarantee it won't happen to you.

Then you can keep your replaced regulator in your locker... it may not have a warranty but it could help someone else when they have a problem!

**Advantages of the
Gaslow Stainless Steel Hose**

- Built to EN10380
- Should be changed every 20 years
- Welded end fittings
- Zero permeation therefore NO smelly hoses
- Extractable materials 0%

System comprises a 30mbar regulator with 750mm Stainless Steel Hose for Gaslow Refillables and also an 01-1674 adaptor for Propane.

Tel: 0845 4000 600. www.gaslow.co.uk

Flexible Stainless Steel inner eliminates plasticiser extraction which is causing regulator failure.
